

Inventory Management

- Create Devices
 - Allows the user to add one or more devices to their inventory.
 - Device includes the following fields: Date, Supplier, Manufacturer, Model, Colour, Battery %, Grade, Issues, Cost, IMEI, Selling Price (optional).
 - ^This design will be similar to the +Bulk Quote design
 - Generate a small(How Small? About 7cm x 3cm, or whatever size in that range is standard with label printers) label with information (Exactly what information? Manufacturer, model, grade, Issue, IMEI, Barcode) to be printed alongside a bar-code (Which encoding for the barcode?). We can leave the barcode/label until the end, but good this system is developed with the intention of eventually adding in the barcode/label
- Edit Devices
 - Allows the OWNER user to modify any and all fields from a previously created Device.

===== ESTIMATED: 5hh =====

- Delete Devices
 - Allows the OWNER user to delete any Device. Available from View.
- Views
 - Owner
 - Table listing all Devices with all their attributes, with options to sort and search devices.
 - Devices are selectable.
 - Selected Devices can be deleted.
 - Selected Devices can be sold.
 - How would the editing of selected Devices work? Considering that one or more of the devices have completely different parameters

===== ESTIMATED: 3hh =====

- Selling Devices.
 - A Form that allows previously entered and selected Devices to be sold.
 - Requires the following inputs:
 - Displays a list with all the currently selected Devices, alongside every Device a Sale Price which can be populated from the Device's Selling Price attribute.
 - Date which can be populated with the current datetime. (This date can be attributed to the whole transaction, not each individual device)
 - Tax % (Name & Percentage)
 - Discount (Optional Field)
 - Customer Name
 - Once the sale has been completed the Devices are removed from the inventory and added to a Sales database.
 - Sales database includes the following fields: Sale Date, Customer, Manufacturer, Model, Colour, Battery %, Grade, Issues, IMEI, Cost, Subtotal (Sale Price), Total (Sale Price + Tax), Profit (Total – Cost).
 - After each sale generate a printable PDF Invoice.

===== ESTIMATED: 9hh =====

- Client
 - Accessible from URL. No login required.
 - Table listing all Devices with less attributes, with options to sort and search devices.
 - Shown attributes are as follow: Manufacturer, Model, Colour, Grade, Issues, Battery %, IMEI, Selling Price as Price.

- Are these Devices coming from the same Devices list as the owner view? So if an OWNER inputs a new Device, it will be available in this view as well?
 - Yes that's correct, however since this view will be for customers there will be fewer fields, fields like "cost", "supplier", "purchase date" etc. will not be included

===== ESTIMATED: 2hh =====

TOTAL ESTIMATED: 19hh

Rate: 24 \$/hh

Total milestone: 19hh * 24\$/hh = 456\$
